

BE A PART OF THE CHANGE, EARTH DAY 2021

Our next challenge to our Interact clubs is a collection and recycling project. The club that collects the most bags of trash or recyclables will win the prize.

Clubs can collect items from their schools, local community areas, from your sponsoring Rotary club or simply donations from friends and family members. Reducing our carbon footprint is good for everyone and this can be a fun way to make a big impact. Items that can be recycled would be preferred but all collected trash will count towards the challenge. This challenge is completely voluntary, but the club that collects the most bags will receive a \$150 gift card and the teacher sponsor will receive a \$50 gift card.

When: March 15th-April 22nd

What: collecting trash and recyclables from your local community

Why: In celebration of Earth Day 2021

How: collect bags of trash, document the total bags collected, then drop those items off at the appropriate recycling or trash center

Reward: Helping to reduce pollution and a chance to win \$200 worth of gift cards for your club.

Please send any pictures or questions to Interact6910@gmail.com so we can share all the wonderful work with the Rotary District.
